PROFESSIONAL SUMMARY

Frontend Engineer specializing in **React.js**, **TypeScript** and **GraphQL** with experience building enterprise-scale applications serving millions of users across global platforms. Delivered measurable impact through performance optimization, reusable component architecture and AI-powered workflow automation, including improving Lighthouse scores from **50 to 80+**, reducing LCP by **40%**, and building an intelligent fleet damage assessment platform that reduced processing time from **45 minutes to 10 seconds**.

WORK EXPERIENCE

Software Development Engineer | Avis Budget Group

Oct 2023 – Present

Bangalore, India

React.js • TypeScript • GraphQL • Ag-Grid • Material UI • REST APIs • CI/CD

- Led frontend architecture and development for the **Corporate Real Estate suite** (Lease, Location, Airport, Finance) on a Fortune 500 platform serving **60+ countries**; established reusable component patterns across **5+ modules**, reducing duplicate code by **30%** and accelerating feature delivery.
- Built high-performance **Ag-Grid** experiences handling **100k+ rows** with server-side pagination, dynamic filtering and CSV export; designed and consumed **GraphQL** schemas powering Fleet Management dashboards.
- Improved **avis.com** Core Web Vitals: Lighthouse **50 → 80+**, LCP **4.2 s → 2.5 s** (–40%), CLS < **0.1**, FID < **100 ms** via code-splitting, lazy loading, image optimisation and CDN delivery.

Software Engineer | Tata Consultancy Services

Oct 2020 – Mar 2023

Bangalore, India • Client: DSB Bank, Denmark

React.js • TypeScript • JavaScript • ServiceNow • REST APIs • HTML5 • CSS3

- Owned frontend development across **8+ enterprise applications** serving **3M+ users**; delivered **3 major releases** independently from requirements gathering through UAT and production deployment.
- Built **10+ reusable React components** across 3 applications, reducing per-feature delivery time by **20%**; practiced **Agile/Scrum** with bi-weekly sprints, peer code reviews and cross-functional stakeholder collaboration.
- Earned **Best Team Award** and **On-the-Spot Award** for high-impact contributions, technical ownership and consistent delivery excellence.

PROJECT – AVIS BUDGET GROUP HACKATHON 2026

CIPHER – AI Fleet Damage Intelligence Platform *React • TypeScript • AWS Bedrock • Strands Agent SDK • Generative AI*

- Built an AI-powered fleet damage intelligence platform using a **5-agent AWS Bedrock** architecture, reducing assessment time from **45 minutes to under 10 seconds** with **98.6% accuracy** and **80%+ lower operational cost**.
- Delivered the complete frontend in **48 hours**: real-time pipeline visualisation, multi-image upload, analytics dashboards and JWT authentication using **30+ React/TypeScript components** with responsive design and WCAG accessibility.

TECHNICAL SKILLS

Frontend & Languages: React.js, Next.js, TypeScript, JavaScript (ES6+), Redux, React Hooks, HTML5, CSS3, Tailwind CSS, Material UI, Ag-Grid, Webpack, Vite, Responsive Design, WCAG Accessibility

APIs, Testing & DevOps: GraphQL, REST APIs, Apollo Client, Node.js, Jest, React Testing Library, AWS (Bedrock, S3, Lambda), Git, GitHub, CI/CD Pipelines, Agile, Scrum, JIRA

AI-Assisted Development: Kiro, Amazon Q, Claude, ChatGPT – daily AI coding environments for code generation, intelligent refactoring, debugging and automated PR reviews; Strands Agent SDK, Prompt Engineering, LLM Integration

EDUCATION

B.Tech in Computer Science & Engineering

2016 – 2020

Lovely Professional University, Punjab, India
